

# Company Profile

# Creating accessible **Agri-Business** opportunities for the under-served using **Technology**

Over 70 percent of Nigerians engage in the agriculture sector but mainly at a very subsistence level.

Despite the contribution to the economy, Nigeria's agricultural sector faces many challenges which impact on its productivity. These include; poor land tenure system, low level of irrigation farming, climate change and land degradation. Others are low technology, high production cost and poor distribution of inputs, limited financing, high post-harvest losses and poor access to markets. - FAO

We believe that investing in core sectors like agriculture, education and health continues to remain the most viable ways to improve the economy of Nigeria while taking underserved people out of the poverty line to being able to access diligent and fulfilling work.

**To our current clients, thank you for always believing and trusting in our capacity and ability to deliver your projects. To our potential clients, we can't wait to meet you and partner with you to achieve your set goals and business objectives. Welcome to Techplot Projects & Consulting.**

**Engr. Ahmed Yusuf Doro**  
MD/CEO

## Intro

# About Techplot\*

We are a technology company and more. The vision behind TECHPLOT is to drive innovation across sectors utilizing technology. We go further to actively work towards bridging the gap between underserved demographics and access to diligent + fulfilling work.

We believe everyone should be able to enjoy these benefits without regard to gender or social status.

Techplot is a youth-led company with a strategic vision to be a foremost

technology enterprise using technology to establish and foster projects with direct impact on communities. These projects we believe will enable social inclusion for our people and progressive economic growth for the nation across sectors.

This drive has led us to focussing on the key sectors that we believe has shown the most promise to help us achieve our vision; Agriculture, Technology and Capacity Building.

**“ I take this opportunity to congratulate the team at Techplot for continuously delivering over our expectations. We hope to continue work with you and we believe in this mutually rewarding partnership.**

**Dr. Bello Abubakar**

National President  
Maize Association of Nigeria  
(MAAN)

# Vision & Mission

To become a leading IT company in the agricultural sector by forming beneficial and profitable partnerships with smallholder farmers and other key stakeholders in Nigeria.

To provide quality IT and agri-business consulting services to our clients in their respective fields, constantly delivering great value through our professional service and structured processes.

## Our Values

### Innovation

We are committed to not just doing new things but also creating environments where the execution of new ideas can connect

### Results Driven

Passionately committed to continuously raise the bar in exceptional service delivery and thorough processes.

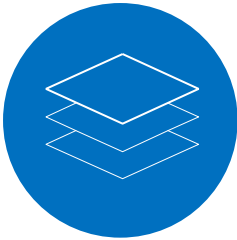

### People & Service

Committed to empowering people, providing decent and fulfilling work while delivering top-tier services to our clients.

# Our Approach

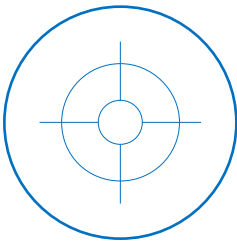

We support our clients from conceptualization, implementation design and strategy to project delivery and support, by setting them up, connecting them to the right partners and helping them achieve project success.

We have excellent understanding of the business environment in all the sectors that we operate in, we have extended knowledge of the processes and structures required to deliver results.

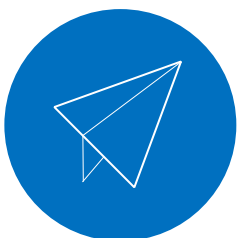

## **1 PREPARE & STRUCTURE**

Our approach to project delivery starts with exploring the project, understanding the task and exploring possibilities. We analyse your project, your company and available structure – to enable us prepare/design a unique approach and strategy for the successful delivery of the project.

## **2 PROJECT INSIGHT & PARTNER MAPPING**

Using data from the prepare and structure step, we will develop insights & report comparing with similar projects, highlighting project risks, recommendations and approach, then we use this information to carry out partner mapping where required. We will also support with partner relations for the entirety of the project or as agreed.

## **3 NAVIGATION (DELIVERY, SUPPORT & GROWTH)**

In our approach to consulting, we frame “implementation” as “navigation.” We work with our clients to address challenges that arise, remaining flexible and open to adjusting course. Our approaches are grounded in learning and collaboration, which enables us to provide solutions that create value and move organizations forward.
